

Kairos Eido Technologies

Turning manual operations into automated, scalable systems — built around how your business actually runs.

Darish Jerlin J — darishjerlin@karunya.edu.in — 9342161834

The Problem

→ Paper & Spreadsheet Chaos

Errors, duplicate work, and stalled growth from fragmented tools.

→ Software That Doesn't Fit

Off-the-shelf tools force the business to adapt to the tool — not the other way around.

→ Freelancers Disappear

One-off builds with no support, no process analysis, no accountability.

→ Enterprise = Unaffordable

The same problems get solved — but small businesses are priced out entirely.

Why Kairos Eido is Different

• Process Audit First

Every build maps to the client's actual workflow — no templates.

• Long-Term Partnership

Support, hosting, hardware, and monthly enhancements — included, not upsold.

• Measurable Outcomes

Every case study has a real three-year savings number behind it.

• SMB Pricing

Full-featured systems at a fraction of comparable SaaS or enterprise cost.

Custom software and SaaS, built around how the business already runs.

Tailored, Not Templated

Custom management systems, SaaS platforms, workflow automation, billing, inventory — designed per client.

Modern Cloud + AI

Scalable cloud architecture with AI layered in only where it adds measurable value.

Diagnostic-First

Every engagement opens with a deep operations map — find the bottlenecks, then design around them.

The Right Fit

Freelancers lack continuity. Enterprise lacks affordability. Kairos Eido combines both.

Real businesses. Real numbers.

Four clients. Four outcomes. All built on Kairos Eido's process-first methodology.

i Tech Academy

Up to ₹20 lakh saved over 3 years

Custom LMS — online certification, proctored exams, regional expansion unlocked.

Cable Service Operators

Est. ₹10–15 lakh in labor costs avoided over 3 years

Customer Management System — centralized records, automated renewals, reduced field visits.

Windsor Garden Resort

~₹15 lakh saved over 3 years

Resort Management System — attendance, GST invoicing, event bookings, full reporting.

Ponmani Agencies

Break-even in 1 - 2 months, then pure profit

Billing & Inventory — barcode generation, GST, full accounting, payroll, CRM.

Client Story — i Tech Academy

₹18–20L

saved over 3 years

The Problem

Offline training institute in Tirunelveli — handwritten records, spreadsheets, no way to certify students online or expand regionally.

Comparable platforms for 1,000 active students with proctoring run \$150–700+/month. At Kairos Eido's flat \$35/month, the three-year spend is ~\$1,260 vs. \$5,400–\$25,200 for an equivalent platform — a **76–95% reduction**. Nearly all of it converts straight to profit. That's before counting the revenue i Tech Academy can now capture by certifying students beyond Tirunelveli — a market they were structurally locked out of while paper-based.

[← Back to Client Stories](#)

The Solution

Full LMS with Admin, Teacher & Student portals; proctored exams, automated reminders, real-time communication; self-hosted. Next phase: AI-driven administration and skill-based student placement.

Client Story — Cable Service Operators

₹10–15L

estimated labor cost avoided over 3 years

The Problem

Customer data and set-top box IDs tracked on paper, or via 3–4 field staff physically visiting homes — slow, costly, and error-prone at scale.

Operators typically run 3–4 field staff at ₹10,000–15,000/month each — roughly ₹35,000–50,000/month, or ₹12.6–18 lakh over three years. With the app centralizing data at ~₹1 per customer record, that labor cost drops to a fraction, even with a reduced (not eliminated) field team.

The Solution

Centralized app — set-top box tracking, automated payment/renewal reminders, centralized records, and workforce management for remotely assigning and tracking field staff.

 *Note: figures above are a representative estimate based on typical operator scale — not an audited client number.*

[← Back to Client Stories](#)

Client Story — Windsor Garden Resort

~₹15L

saved over 3 years — fully inclusive

The Problem

Employee records, attendance, inventory, event bookings, and expenses tracked manually — causing data inconsistencies and scheduling conflicts, especially with overlapping event bookings.

Manual overhead this system replaces typically runs ₹25,000–75,000+/month. Against Kairos Eido's flat ₹7,500/month — including hardware, backups, and monitoring — that's ₹6.3–24.3 lakh saved over three years, with a realistic mid-point of ~₹15 lakh. Eliminating double-booked events and gaining same-day cash flow visibility also reduces revenue leakage that doesn't show up in a cost comparison but matters just as much to three-year profitability.

[← Back to Client Stories](#)

The Solution

Unified system — attendance/leave, GST invoicing, cash flow, inventory with damage logs, event booking with overlap alerts, and operational logs for vehicles, fuel, and energy — with full reporting.

Client Story — Ponmani Agencies

Break-even in 1 –2 months

then pure profit

The Problem

Billing, invoicing, and product records managed manually — slow, error-prone, no barcode system for inventory.

Recurring billing tools with this feature depth typically run ₹750–3,500/month. Against Kairos Eido's one-time ₹30,000 payment, break-even arrives in 9–20 months. By year three, Ponmani is ahead by an estimated ₹24,000–96,000 — and every month past break-even is money that would otherwise have left the business.

[← Back to Client Stories](#)

The Solution

Full billing and inventory platform with automatic barcode generation, fast and accurate invoicing, GST, full accounting (ledgers, P&L, balance sheet, bank reconciliation), payroll, CRM, multi-branch management — plus complete hardware setup.

A long-term technology partnership, not a one-time sale.

Recurring Revenue Model

Monthly fees from **₹1 to ₹8,000** — scaled to business size, user count, and solution scope.

Everything Included

Custom development, SaaS platforms, cloud hosting, hardware setup, process automation, consulting, and continuous enhancement.

Ongoing Engagement

We stay engaged with clients throughout the month — not just at delivery.

Core Goal

Save time, cut cost, grow profit, and open new markets as clients scale.

Early Traction

₹1.5L+

Revenue in Month 1

Since commencing operations mid-June 2026, Kairos Eido generated approximately **₹1.5 lakh+ in revenue in the first month** — early validation of both demand and the business model.

Let's build the system your business deserves.

Turning manual operations into automated, scalable systems — built around how your business actually runs.
